Heat Zone 2

with Helen Blythe-Hart

Supplies & Materials

Because this is a demo-packed workshop, students will have time to try a few of the most important techniques, but not all of them. Some will be self explanatory. Because we'll be doing several techniques on the same piece, scrap silver can be used if it's available.

SILVER

- 1" x 2" 22ga sterling sheet
- 3 feet 18ga sterling round wire
- 3" X 1/8" fine silver bezel
- 2" tubing to fit 18ga ID wire
- Scrap silver (approx. 1 oz)

SOLDER AND FLUX WILL BE PROVIDED BY MAGG

TOOLS

- 6 1/2" medium diamond type inexpensive stainless tweezers
- Bent insulated cross-lock tweezers
- Offset non-insulated tweezers
- Jeweler's saw with 4/0 blades
- Joyce Chen-type scissors
- Metal scribe
- Sharpie fine point marker
- Pliers
- Hand or needle files
- .9 and .7mm HB or #2 mechanical pencil lead containers
- Sanding discs for flex shaft - medium plastic backed square center snap-ons & mandrels
- Wire snips
- Masking tape 1" (not blue or green)
- Notebook
- Pen/pencil
